CASH PAYMENT, CHICAGO!

The World's Fair for 1892 has one promise of brilliant success. The difficulties which beset it are many and great. Nearly all large achievements have been thus handleapped, so that these obstacles and the hard task of clearing them away may be regarded as a really promising augury.

The present hitch is one quite intrinsic. There seems to be grave doubt whether Chicago can raise the necessary funds for carrying out the World's Fair. When the bill for the Fair was before Congress Mr. Springer, speaking for Chicago, made this declaration: "We will ask no money from Congress except what will be required for the buildings and exhibits of the Government "

It goes on to say that if the Fair is a National Fair, the nation ought to help, and that Chicago means to ask it to put up just as much as she puts up.

CANADIAN INDEPENDENCE.

There is a movement on foot to secure for Canada its independence. Already the plan of action has been well mapped Pacific measures will be resorted to that the Dominion instead of being a bernacle on the Britannic rock of empire may revel in her own rule.

Canada for the Canadians!" "Let us rule ourselves!" These are two of the war cries. Young patriotic Canadians feel that the welfare of their country demands that she should be more than a tributary province of England. This active, energetic element in Canada hopes for the accomplishment of this design by the year 1892.

We have a fellow-feeling for Canada. Good luck to its endeavors.

Kalamazoo, the Western town with the weird name, has had a dreadful educational outbreak. Students of Kalama soo College have seized, bound and left in a distant cornfield two of the august professors of the institution. The professors were unpopular. This is a sad blow to the cause of education. The native Judge refuses to issue warrants for the kidnapping students' arrest on the ground that "they committed no erime." Dear, dear!

It may be too late to rescue the fair Goddess of Liberty from the sordid sursoundings which will be hers if her little teland is to be the centre of the business connected with the reception of emigrants. Let her serene visage gaze benignly on them as they are borne to some more fitting spot for their debarkation. The statue of Liberty is the country's chief monument and deserves the respect which beautiful surroundings accord.

IMPORTANT IN SPRING.

Advice What People Should Take During the Spring Months A Remedy Certain to Produce Beneficial Regults.

In the Spring everybody begins to think about taking a Spring medicine. Not only is this a very common practice, but a vary necessary and health-ful one. It is a fact which physicians exhowledge and the people recognize generally, that a fipring tonic taken during the months of March, April and May is more conducive to the restoration of health in cases of those who are sick, than any other in cases of those who are sick, than any other course of treatment that could possibly he adopted, It is further understood by everybody that even for those who call themselves well it is very important at this season of the year, if they would maintain good health and vigor, to take a Spring remedy to strengthen and invigorate the serves, tone up the action of all the organs, and thus, by creating a healthy condition of the nerves, blood, stomack, liver, kidneys, and bowels, assist nature in the efforts abe sivary makes in the Spring & in the efforts she always makes in the Spring to

cleanse, purify and invigorate the system.

People in the Spring bare a languid and weakened feeling, with more or less nervousness and
debility. There will be a weak, tired and narvous condition, with sleepless and restless nights, a tired waking in the morning, no appetite for break-fast, a had taste in the mouth, dull head and general dispirited feelings.
For such cases as these be sure and use that re-

markable invigorator and tonic, Dr. Greene's Nevura, the great nerve, brain and blood invigora-tor. It is prenounced by everybody, dectors as well as the people, to be the best spring medicine in existence, and has taken rank as the greatest and most important medical discovery of modern times. Under the use of this wonderful remedy that weak, tired and nervous feeling disappears: the nerves become strong and steady; the nights are restful and the sleep natural and refreshing: the appetite returns, good digestion and regular action of the bowels are established, the kidneys and liver are restored to healthy action, and the vital energies, strength and vigor of the system

perfectly built up.
This truly remarkable Spring remedy, which is
purely vegetable and harmiess, is for eals by all
druggists at \$1.00 per bottle, and if any one dedruggists at \$1.00 per bottle, and if any one de-sires to be perfectly and permanently oursed of all those disagreeable feelings, weakness and exhaus-tion locident to Spring, take our urgent recom-mendation and get a bottle of this medicine. It will repay you, as we can testify from our own experience of its marvellous curative powers, and you ence or its marvatious curative powers, and you have our assurance that you will not be disappointed. Be sure and ask for Dr. Greene's Nervara, as druggists sometimes recommend their own preparation or something on which they can make a greater profit. Do not be persuaded to take any other remedy in place of this, as we know that this is the greatest and best of all Spring medi-cines. Dr. Greene, the discoverer of this wooder-ful remedy, is the skilful specialist in the cure of tion and advice to the sick free of charge at his

"BUCKS" AT THE DOG SHOW.

A New Variety of Society Man, Re-

cently Developed. Society always goes to the dog show,

and you may see more pretty and welldressad women in an hour at the show than in a mile of the Broadway promenade, says the New York correspondent of the Pittsburg Post. You recognize at the dog show that fashionable New York has developed a peculiar type of manhood. He is a broad-shouldered, sturdy, well-appointed fellow, in lond English clothes, with unmistakable evidences of athletic training. Dude is hardly the word for him, but if

this man would be a buck.
You meet members of the fashiousble
set in all sorts of unfashionable places
at literary clubs, and sven in newspaper
offices; but to know the buck by sight,
you must either belong to the fashionable
set or attend the dog show.
Members of the fashionable set do all
sorts of things. Some write books; one
that I know has gone to study insects or
some such thing in Brazil; another that
I know of helps to rescue the tensmenthouse dwellers from moral degradation;
but the buck does none of these things.
He merely attends strictly to his own
physical needs, and likes to kill time in
the most scientific manner. He is an odd
product of American civilization.
